Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE one MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 7, and 31 drawn to a method of increasing crop yield, classified in class 47, subclass 39, for example.
 - II. Claim 2, drawn to a method of accelerating crop emergence, classified in class 47, subclass 58.1, for example.
 - III. Claim 3, drawn to a method of accelerating crop maturity, classified in class 47, subclass 65.5, for example.
 - IV. Claims 8-12, drawn to a seed composition, classified in class 47, subclass 57.6, for example.

Claims 4-6 and 13-20 will be examined to the extent that they read on the elected invention.

2. The inventions are distinct from each other because of the following reasons:

Inventions I, II, III, and IV are held to be separate and distinct from each other. A method of increasing crop yield requires a separate search than a method of accelerating crop emergence, or a method of accelerating crop maturity. The acceleration of crop emergence does not

Art Unit: 1661

necessarily translate to a higher crop yield as many other factors besides emergence are intrinsic to yield. In the same manner the acceleration of crop maturity does not necessarily correspond to increased yield or accelerated crop emergence. Similarly, a seed composition requires a separate search from methods of manipulating crops. The product and each particular method do not make the others obvious. Searching each of the methods is additionally a burden on the Examiner.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification or by their recognized divergent subject matter and because the search required for each Invention is not required in the other Inventions, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
